Appl. No. 09/929,424

Atty. Docket No. 10011005-1

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (original). A system for accessing network-accessible devices comprising:

multiple network-accessible devices, each device comprising:

a wireless transmitter for wirelessly transmitting associated address data for receipt by individual client devices, the address data being configured for use in accessing, via a network, a network-accessible device that wirelessly transmitted the associated address data; and

a connection module for establishing a network link with one or more client devices based upon the wirelessly transmitted address data, said link permitting individual client devices to access a network-accessible device using the associated address data.

Claim 2 (original). The system of claim 1, wherein said link comprises a wireless link.

Claim 3 (original). The system of claim 1, wherein said link comprises a wired link.

Claim 4 (original). The system of claim 1, wherein said link comprises an Internet link.

Claim 5 (original). The system of claim 1, wherein said link comprises a wireless Internet link.

Claim 6 (original). A system for accessing Internet-connected printers comprising:

1095223.1

- 4 -

Appl. No. 09/929,424

Atty. Docket No. 10011005-1

one or more Internet-connected printers, individual printers
comprising:

a wireless transmitter for wirelessly transmitting associated address data for receipt by individual client devices, the address data being configured for use in accessing, via the Internet, an Internet-connected printer that wirelessly transmitted the associated address data; and

an Internet connection module for establishing an Internet link with one or more client devices based upon the wirelessly transmitted address data, said Internet link permitting individual client devices to access an Internet-connected printer using the associated address data.

Claim 7 (original). The system of claim 6, wherein the Internet connection module is configured to establish a wireless Internet link.

Claim 8 (original). A network-accessible device comprising:

one or more processors;

one or more computer-readable media;

a wireless transmitter for wirelessly transmitting address data associated with the device, the address data being useable to establish an Internet connection with the device;

an Internet connection module for establishing an Internet connection; and

instructions on the computer-readable media which, when executed by the one or more processors, cause the processors to:

transmit address data for the device using the wireless transmitter;

establish an Internet connection using the connection module, the Internet connection being establishable with one or more client devices that receive the wirelessly transmitted address data, and being based on the wirelessly transmitted address data; and

permit interaction with the device via the Internet connection.

Appl. No. 09/929,424

Atty. Docket No. 10011005-1

Claim 9 (original). The network-accessible device of claim 8, wherein the Internet connection comprises a wireless connection.

Claim 10 (original). The network-accessible device of claim 8, wherein the Internet connection comprises a wired connection.

Claim 11 (original). The network-accessible device of claim 8, wherein the wireless transmitter comprises a bluetooth transmitter.

Claim 12 (original). The network-accessible device of claim 8, wherein the address data comprises at least one URL.

Claim 13 (original). An Internet-connected printer comprising:
one or more processors;
one or more computer-readable media;
a wireless transmitter for wirelessly transmitting address data associated with the printer, the address data being useable to establish an Internet connection with the printer;
an Internet connection module for establishing an Internet connection; and
instructions on the computer-readable media which, when executed by the one or more processors, cause the processors to:
transmit address data for the printer using the wireless transmitter;
establish an Internet connection using the Internet connection module, the Internet connection being establishable with one or more client devices that receive the wirelessly transmitted address data, and being based on the wirelessly transmitted address data; and
permit interaction with the printer via the Internet connection.

Claim 14 (original). A client device comprising:
one or more processors;
one or more computer readable media;

1095223.1

- 6 -

Appl. No. 09/929,424

Atty. Docket No. 10011005-1

a wireless receiver for receiving wirelessly transmitted address data associated with one or more Internet-accessible devices;

a connection module for establishing an Internet connection; and instructions on the computer-readable media which, when executed by the one or more processors, cause the processors to:

establish an Internet connection using the connection module; process address data wirelessly received by the wireless receiver from at least one Internet-accessible device; and

establish an Internet link with one or more Internet-accessible devices using the address data.

Claim 15 (original). The client device of claim 14, wherein the Internet connection comprises a wireless connection.

Claim 16 (original). The client device of claim 14, wherein the Internet connection comprises a wired connection.

Claim 17 (original). The client device of claim 14, wherein the instructions cause the processors to establish a wireless Internet connection.

Claim 18 (original). The client device of claim 14, wherein the instructions cause the processors to establish a wired Internet connection.

Claim 19 (original). The client device of claim 14, wherein the wireless receiver comprises a bluetooth receiver.

Claim 20 (original). The client device of claim 14, wherein the address data comprises a URL.

Claim 21 (original). A method for accessing network-accessible devices comprising:

wirelessly beaconing address data associated with a particular device, the address data being configured for receipt by one or more client

Atty. Docket No. 10011005-1

devices so that the one or more client devices can use the address data to establish an Internet link with the particular device for interacting with the particular device; and

establishing an Internet link with one or more client devices based on the wirelessly beamed address data, said link permitting interaction between the particular device and the one or more client devices.

Claim 22 (original). The method of claim 21, wherein said beaconing is performed by the particular device.

Claim 23 (original). The method of claim 21, wherein said beaconing comprises using infrared technology to beacon the address data.

Claim 24 (original). The method of claim 21, wherein said beaconing comprises using RF technology to beacon the address data.

Claim 25 (original). The method of claim 21, wherein said beaconing comprises using bluetooth technology to beacon the address data.

Claim 26 (original). The method of claim 21, wherein said address data comprises a URL.

Claim 27 (original). The method of claim 21, wherein said establishing the Internet link comprises establishing a wireless Internet link.

Claim 28 (currently amended). One or more computer-readable media having computer-readable instructions thereon which, when executed by one or more processors on a network-accessible device, cause the processors to:

wirelessly beacon address data associated with a the network-accessible device, the address data being configured for receipt by one or more client devices so that the one or more client devices can use the address data to

establish an Internet link with the network-accessible device for interacting with the network-accessible device; and

establish an Internet link with one or more client devices based on the wirelessly beacons address data, said link permitting interaction with the one or more client devices.

Claim 29 (original). A method for accessing Internet-accessible devices comprising:

discovering one or more Internet-accessible devices by wirelessly receiving one or more URLs associated with and transmitted by the Internet-accessible devices;

establishing an Internet connection with the one or more Internet-accessible devices based on the one or more URLs; and

interacting with the one or more Internet-accessible devices via the Internet connection.

Claim 30 (original). The method of claim 29, wherein said establishing comprises establishing a wireless Internet connection.

Claim 31 (original). The method of claim 29, wherein said establishing comprises establishing a wired Internet connection.

Claim 32 (original). A method of accessing an Internet-connected printer comprising:

wirelessly receiving, with a client device, address data associated with one or more Internet-connected printers;

processing the address data with the client device to establish an Internet link with one or more Internet-connected printers; and

interacting with the Internet-connected printers via the Internet link.

Claim 33 (original). The method of claim 32, wherein said wirelessly receiving comprises bringing the client device into close proximity with an Internet-connected printer that is transmitting address data.

Claim 34 (original). The method of claim 32, wherein said processing comprises establishing a wireless Internet link using the address data.

Claim 35 (original). The method of claim 32, wherein said processing comprises establishing a wired Internet link using the address data.

Claim 36 (original). One or more computer-readable media having computer-readable instructions thereon which, when executed by one or more processors on a client device, cause the processors to:

wirelessly receive, with the client device, address data associated with one or more Internet-connected printers;

process the address data with the client device to establish an Internet link with one or more Internet-connected printers; and

interact with the Internet-connected printers via the Internet link.
